wok	walk		
o	or		
sabi	know, understand		
wei	way, suffix for direction (e.g. shopwei – towards the shop)		wai, wey
gan	can't	kaan, gaan	gun

Teachers Notes

- These make great classroom displays. Most classrooms have similar English resources displayed - print on A3 paper on coloured paper matching the colours listed on each page (Yelowan - Yellow, Redwan - Red, Bluwan - blue, Grinwan - green)
- As classroom displays, coach students to refer to them constantly to help them write Kriol independently. These displays feature some of the most common Kriol words and should let students being to write independently once they know what words on these posters.
- If students have Kriol workbooks, you can also print A5 mini-versions for them to glue on the inside covers as personal reference materials.
- You can also create a lot of classroom activities around these posters:
 - Easy spelling tests using the words on these pages - students simply need to find and copy the word. It starts to make writing these easy words automatic for them
 - You can do the same with sentences. Use the words on pages to make sentences and this will get students starting to compose sentences and make a start at composing Kriol texts
 - You can also use printouts of these sheets to play word bingo
